

Q73. A data warehouse was set up, but it is hardly used. The result of a hearing suggests that the users' skill level is lower than expected. Which of the following is an appropriate measure for improvement to promote usage?

- a) To add more information that is believed to be requested by users
- b) To prepare, as standards, templates according to data extraction and analysis patterns
- c) To provide the data more close to real time, and improve the data precision
- d) To send a notice to promote usage through management
