

Q38. In the GUI design of visual panels, how to input the data of “Number of copies” is under review. If there are both keyboard and mouse available as input devices, which of the following options is the best choice that can be acceptable to a wide range of users? Here, the value of “Number of copies” can range from 1 up to the maximum number of copies.

a) [Drop-down list]

A GUI element for a drop-down list. It consists of a rectangular box with a light gray border. Inside the box, the text "Number of copies:" is on the left. To its right is a smaller box containing the number "1". On the far right of the box is a small downward-pointing arrow icon, indicating that the list can be expanded.

b) [Radio button]

A GUI element for radio buttons. It consists of a rectangular box with a light gray border. Inside the box, the text "Number of copies:" is on the left. To its right are three vertically stacked radio buttons, each followed by a number: "1", "2", and "3". The first radio button (next to "1") is selected, indicated by a solid black dot in the center.

c) [Spin box]

A GUI element for a spin box. It consists of a rectangular box with a light gray border. Inside the box, the text "Number of copies:" is on the left. To its right is a smaller box containing the number "1". On the far right of the box is a small icon consisting of two triangles, one pointing up and one pointing down, indicating that the value can be incremented or decremented.

d) [Text input field]

A GUI element for a text input field. It consists of a rectangular box with a light gray border. Inside the box, the text "Number of copies:" is on the left. To its right is a smaller box containing the number "1". There are no additional icons or controls visible on the right side of the box.
