Q66. Which of the following appropriately describes a schema in a relational database management system?

a) It is a set of data definitions such as the data properties, format, relationship with other data, etc.

b) It is not an actual table but a virtual table from the perspective of the user.

c) It is the general term for database operations such as data insertion, updating, deletion, search, etc.

d) It is the general term for various conditions and constraints that are used to maintain the database in absolutely perfect condition.
